

chargerable inverters dealers in ghana

chargerable inverters dealers in ghana

We're very pleased to expand our range of camping & leisure accessories with the introduction of Ring in-vehicle power solutions. Ring Automotive is a leading name in vehicle electrics, including a strong range of modified sine and pure sine inverters. Our core range of Ring inverters should include the inverter and any supporting mods you may need to power your work van, day van, or full-blown camper. Whether you're powering an electric strimmer or running a home-from-home, Ring has you covered.

Like the Victron Multiplus, the "Easyplus" is a multi-functional combined inverter/charger, but with the added benefit of pre-made wiring and built-in RCD and MCB's, eliminating the need for an external AC distribution unit. Ideal for smaller systems, particularly where space may be limited, and also saving time during installation.
