Global warming of 1.1 degrees Celsius is leading to unprecedented climate changes, from rising sea levels to more frequent extreme weather events, impacting ecosystems and communities worldwide.

Since our inception in 2009, we've been committed to renewable energy solutions, providing high-quality solar equipment and services to thousands of homes and businesses. Together, we've helped save massive CO2 emissions.

We set out with a mission to make renewable energy accessible. We found there was a need to do things differently by advancing the know-how to realise our ambition. So we evolved with innovative ways of realising energy access through knowledge transfer.

As a women-led social enterprise, Power Sisters has affirmed high-level support for advancing gender equality on the road to ensuring universal energy access. Over 80 per cent of WIRE's board is comprised of women leaders from the finance, technology and renewable energy sectors.

We design and supply top-tier solar energy systems, focusing on reducing energy usage and fostering sustainable electricity generation. Our services extend from sophisticated solar PV systems for homes and businesses to dynamic public space lighting, ensuring every installation meets the highest standards of quality and efficiency.

The popularity of solar panels is skyrocketing. More than 1.3 million rooftops in the UK are now decked out with panels – and with solar panel costs decreasing massively over the past decade, it's more accessible than ever.

But there's much more to it than that, so let's discuss the key pros and cons of switching to solar energy. If you've already started picturing panels on your roof, find out how much a solar PV system would cost you by filling out this form – our trusted installers will be in touch before you can say "photovoltaic".

Powering your house with solar-generated electricity can shave a hefty sum off your monthly energy bills. On average, a 3.5 kilowatt (kW) solar panel system will cost £7,026 – but it'll save you roughly £454.45 each year, depending on where you're located in the UK.
