

12 volt wind generator

12 volt wind generator

Silentwind ProWind Generator 12V exemplifies the evolution of wind turbine design. It is lightweight head, combined with its high-tech carbon fiber blades, offer a simple but reliable product that will withstand the rigorous Marine environment with endless reliability. It truly is a whisper quiet generator and one that any mariner would be proud to have installed on their boat.

Control and power management is accomplished through a remotely mounted controller (w Bluetooth) that can be adjusted to lead acid, AGM, GEL or other various types of battery types. Maximum shutdown power and restart sequence are also programmable. Status display provides the operator with extensive data on the turbine performance including battery voltage, current, amp hours production, etc. In addition this controller offers a hybrid feature allowing up to 300W (20A max) of solar panels to be interconnected. Control a independent load up to 15A.

The product is shipped complete with detailed user manuals and all necessary hardware/tools making installation easy and uncomplicated (mast and connecting wires not included, please see our kits for these additional items).
