

120W Sunshine Lightweight Solar Panel

120W Sunshine Lightweight Solar Panel

The SRGH120 is a glass free monocrystalline solar module fitted into a black aluminium frame. Only weighing approximately half that of a rigid glass solar panel, makes it perfect where weight restrictions are required. The high strength design and impact resistance prevents deformation caused by heat and load and defends against hail, whilst the innovative super insulation and honeycomb structure enhances heat dissipation and energy conversion efficiency.

With this Sunshine 120W solar panel you could expect to generate around 31 amps per day when used in conjunction with a PWM solar charge controller and around 40 amps per day with an MPPT solar controller during the summer months. Multiple panels can be connected to acquire higher power if needed.

Please Note: If you are connecting multiple panels together you may need a bigger solar controller if you are unsure which you require or have any other questions please call 01508 488188 then Option 2 for Technical.

Our aim is to become the UK's preferred online retailer of quality renewable energy products and accessories. Our ethos is one of outstanding customer service and competitive pricing.
