

12v 10 ah lithium battery

12v 10 ah lithium battery

Lithium batteries offer:- High energy density: more energy with less weight;- High charge currents (shortens the charge period);- High discharge currents (enabling for example electrical cooking on a small battery bank);- Long battery life- High efficiency between charging and discharging (very little energy loss due to heat development);- And higher continuous power available is comparatively more environmentally friendly with no heavy metals or toxic materials used.

Used especially in PV Solar panels for solar off-grid and tied-grid systems. These batteries are also excellent for use in motorcycles, snowmobiles, jet skis, motorhomes, leisure, marine, caravan, mobility scooters, toy cars, electric bikes, etc., because they do not need maintenance during the off-season.

BATTERY STORAGE:The battery can be used in any position as it is non-spillable. There is no equivalent to sulfation and the batteries can be stored in any state of charge without worry of degradation. We recommend 50-100% charge before storage. Read more about battery maintenance and storage [here](#)

RETURN POLICY If you are not completely satisfied with your purchase, please return the item to us in its original condition within 7 days of the receipt. Contact us ? If you have any questions or enquiries.

Feedback: Once you have received your goods please leave positive feedback. This will not only tell us you have received your goods, but it will also allow us to leave feedback to you to complete the transaction. If for some reason you are not happy with your goods or any other problem, please contact us before leaving negative feedback so we can sort out the problem. We are only human, and occasionally things do go wrong but we are committed to improving your experience. Happy shopping. Thank you
