There's live pricing 24/7 on the Segen customer portal. On every product page you'll see the current availability, the stock location, and future availability so you can order your solar PV, storage, or heating system and receive delivery the next working day. Clever forecasting, over 20 years of experience in renewable energy has given our team the ability to ensure we have all the stock you need, when you want it, so you can complete your projects on time.

Yes, you can find everything online 24/7 – there's a wealth of information on the Segen customer portal from brochures, datasheets, product specifications, installation manuals, warranty documents, guides, design tools and configurators. Live stock levels, quotes and account information, invoices and design tools, the portal has it all!

Also, Segen customers are assigned dedicated team members to assist with everything they need. There's a Sales Manager who has a huge amount of product and industry knowledge, and the Order Processor who handles the logistics of the deliveries and makes sure they go smoothly. There's a Technical Support Engineer on hand to help with any before, during, and post installation enquiries, and for any finance enquiries there's an expert on hand to keep accounts on track.

Often free extended warranties are available if products are registered online with manufacturers but also, extended warranties are available to purchase from Segen or the manufacturer directly, offering peace of mind to installer and system owner.

There are always great package deals available from Segen with discounts on inverters, batteries and accessories. There's a Clearance section where you can find end-of-line bargains and you'll find special offers from our top manufacturers on this page.

Ensure continuous power for your home and appliances during outages with Storm Watch. It charges Powerwall fully before severe weather hits. During outages, Powerwall supports your solar system or seamlessly switches to stored energy for grid-powered homes.

Powerwall's integrated solar inverter efficiently stores and converts solar energy, allowing you to capture more solar power during the day and use it to power your home for free at night.

A single Powerwall unit can power your home, providing affordable backup protection. With an integrated solar inverter, it has fewer parts, making multi-unit systems more cost-effective and easier to expand.

Looking to simplify your installation? Doncaster Cables, Tesla approved Powerwall Connect cable incorporates the power conductors, the 12V supply and the data cables required to provide an all-in-one

13 kWh commercial energy storage

solution to Powerwall installations. Please see: Powerwall Connect

Segen is the UK's leading renewables distributor offering the largest portfolio of solar panels, energy storage systems, mounting, EV chargers and heat pumps - delivered the very next day!

We first met Engenius in 2007 when they installed our PV array, it being one of their first solar installations on the mainland. Our 28 panels have been making electricity for us trouble-free ever since. Last week they fitted our Zappi 2 charger which allows us to charge our Nissan Leaf with our own home-grown power. We are impressed with their patience and skill, allowing us to understand and join the age of renewable energy and enjoy the benefits.
