

130 kWh energy storage battery suppliers

130 kWh energy storage battery suppliers

At StackRack, we specialize in cutting-edge modular battery systems for residential, commercial, and utility-scale applications. Designed and engineered in the United States, our battery systems are certified and compatible with top inverter manufacturers providing you with the flexibility to create a customized solution tailored to your specific energy needs.

Our modular battery systems, compatible with top-tier inverters like Sol-Ark, Luxpower, and Solis, offer a fully customizable energy storage solution for your home. With StackRack, you can power more circuits, including large appliances, and expand your system as needed. Benefit from energy bill savings through advanced programming, avoiding peak prices, and participating in grid sell-back programs. Achieve grid independence by generating, storing, and using your own energy, safeguarding against costly utility rates and future increases.

Our commercial battery systems seamlessly integrate solar and battery storage to enhance your business operations. Whether you need EV charging solutions with Level 2/3 capabilities, want to optimize self-consumption by generating, storing, and using your solar energy, or aim to shave peak demand costs by utilizing stored solar or off-peak energy, our systems deliver. Additionally, our battery systems provide critical infrastructure backup, ensuring uninterrupted power for essential equipment like servers, surveillance cameras, and refrigerators.

Our utility scale solutions feature cutting-edge megawatt battery systems and grid-forming inverters from SMA, Sinexcel, and Megarevo. Perfect for microgrid development, our solutions empower communities to operate independently of the utility grid. Additionally, they optimize renewable energy by efficiently storing and discharging power, regulate the grid by stabilizing voltage fluctuations and ramp rate control, and support infrastructure by reducing costly upgrades through local, distributed energy storage.

The Power Station Pro (PSP) is an all-in-one energy solution. Designed with solar installers to simplify installation and reduce cost, PSP allows up to 30 kWh of reliable battery storage with options to mount Sol-Ark 15K and Luxpower 12K directly on the cabinet.

Working with StackRack has been a game-changer for us for NEM3. Their scalable products have allowed us to tailor systems perfectly to our customers' different energy needs. We've experienced seamless installations and their support team is always available to help us out whenever needed. Highly recommended!

My experience with these batteries has been outstanding. They integrate seamlessly with Sol-Ark inverters, and the commissioning process is quick. The build quality of the battery cabinets is impressive, and the ability to expand with additional batteries in the future is a major plus for my customers.

130 kWh energy storage battery suppliers

As an installer, we recently purchased one of StackRack's 30kW residential systems and were immediately impressed. The customer service offered by Josh was amazing and if we had any installation questions either he helped out or engaged the manufacturer of the inverter directly. We will be repeat customers in the near future. They are a highly recommended energy storage systems manufacturer.

Great company. Josh has been a pleasure to work with. We get quick quick call backs if we have any questions and support on all of our installs. The batteries are great and work communicate well with Sol-Ark.

I like how you can connect new and existing solar systems. It makes it simple for us to offer battery solutions for all of our customers. The service has also been top notch. Very knowledgeable and responsive.

We've had a great experience working with StackRack. Their 30 kWh system is a great solution for our NEM3 customers and they're approved with our preferred finance companies. Josh has offered great support and supports us with system commissioning.

Great support and innovative products. The cabinets have a lot of features that take some of the stress out of installation. I really like the new batteries with LCD screens. It simplifies commissioning and battery communication with Sol-Ark has been flawless.
