

# 140 kWh commercial solar battery storage

140 kWh commercial solar battery storage

Critical means critical! Solar plus battery, and possibly a generator allows you to ensure your critical systems remain operable 24/7/365 regardless of what is happening outside.

Velo Solar provided us with a professional, well-executed, turnkey solar energy solution. Any issues that came up were handled directly and rapidly. I would not hesitate to recommend Velo to anyone considering a large scale solar installation.

Velo Solar was good to work with and delivered a great product on time and on budget. We are happy with both of our Solar systems and look forward to working with Velo Solar in the future.

Through our Cox Conserves program, Cox Enterprises has an aggressive, but attainable goal to become carbon neutral by 2044. Technology will play a huge role in us reaching this important milestone. Empower's Energy Dashboard helps our site managers take action when it's needed to deliver on our environmental commitment and helps employees see the beneficial effects of our renewable assets.

When renovating our new corporate headquarters to a LEED Gold standard, we were looking for a qualified solar partner to fulfill our unique site requirements. We found that partner in Velo Solar, and together executed a creative design that not only provides energy savings for the building but simultaneously meets our architectural goals for the renovation.
