

150W 12V Sunshine Solar Flexible ETFE Range

150W 12V Sunshine Solar Flexible ETFE Range

This Sunshine Solar Flexible ETFE 150W 12V boasts ultra pure silicon delivering optimal power conversion. A solid copper foundation adds massive strength and prevents corrosion. Thin, light and when fitted to the roof of a caravan or motorhome very aerodynamic. Light weight design combined with high efficiency cells and solar panel flexibility makes the ETFE range also perfect for marine use and many more applications where a rigid framed solar panel is not an option.

The Sunshine Flexible ETFE 150W Solar Panels have been specially manufactured to provide a high DC voltage to maximise battery charging through a higher efficiency MPPT charge controller.

With a Sunshine Flexible 150W 12V solar panel you could expect to generate around 50 amps per day when used in conjunction with an MPPT Solar Controller during the summer months.

Don't forget you can save money on add-ons to compliment your solar kit such as the Remote Meter, not only does this give you valuable data about the overall performance of your solar panel it also gives you info on your battery state of charge and makes setting up your system easier. You may also wish to add some Bostik-360 Fixing Adhesive at a reduced price for bonding the solar panel and cable entry cover.

Our aim is to become the UK's preferred online retailer of quality renewable energy products and accessories. Our ethos is one of outstanding customer service and competitive pricing.
