

2020 top solar contractors list

2020 top solar contractors list

Solar Power World, the industry's leading source for technology, development and installation news, presents the 2020 Top Solar Contractors list. The list ranks applicants according to their influence in the U.S. solar industry in 2019. The list details the headquarters location of a company, employees, its primary market (utility, commercial ...

The list includes hundreds of solar contractors and developers in the United States, listed and categorized by state/territory, service and market. The list includes solar PV companies that provide the following services: sales, EPC contracting, development, construction/installation, electrical work and/or rooftop-specific installations.

The 2020 Top Solar Contractors class installed solar in all 50 states, Washington, D.C., and two U.S. territories: Guam and Puerto Rico. 90% of 2020 Top Solar Contractors work in the commercial market; 77% completed residential work last year; 22% worked on at least one utility-scale project.

Blattner Company, an industry-leading utility scale renewable energy construction company and the parent company of Blattner Energy, Inc. and D.H. Blattner & Sons, Inc., announced that it has achieved the number one ranking out of 407 companies in the annual Top Solar Contractors List by Solar Power World.

Solar Power World has recognized the efforts of solar contractors across the United States in its 2020 Top Solar Contractors list, where local solar installer Wells Solar & Electrical Services achieved a rank of 139 out of 407 companies. The Top Solar Contractors list is developed each year by Solar Power World to honor the work of solar ...

Solar Power World, the solar industry's leading business-to-business publication, today announces the release of the 2020 Top Solar Contractors list. The Top Solar Contractors list is the most recognized annual listing of solar contractors in the United States working in the utility, commercial and residential markets.

"The Solar Power World team is so pleased to highlight more than 400 companies on the 2020 Top Solar Contractors list, especially during this unprecedented time," said Kelsey Misbrenner, senior editor of Solar Power World. "All contractors featured on the 2020 list reported strong 2019 installation numbers and are continuing to stand tall this year."

This year's Top Solar Contractors class is facing obstacles unseen in this industry before. The first quarter of 2020 was the country's largest ever, with 3.6 GW of new solar capacity added. But COVID-19 will show its impact before the year's end. Wood Mackenzie is forecasting the residential and non-residential markets will decrease 25% and 38%, respectively, in year-over-year installation volumes this year.

2020 top solar contractors list

Throughout the data gathering process for the 2020 Top Solar Contractors list, we talked to many companies reporting busier schedules than before the coronavirus epidemic, Misbrener said. Coupled with an increased customer desire to add storage, we believe the installation market will continue to stay busy all year. Companies may be working remotely and a bit leaner, but the solar industry will push through.

Companies on the Top Solar Contractors list are grouped and listed by specific service (developers, electrical subcontractors, EPCs, installation subcontractors, rooftop installers), markets (commercial, residential, utility) and states by 2019 installed capacity (in kWDC).

Blattner Company, an industry-leading utility scale renewable energy construction company and the parent company of Blattner Energy, Inc. and D.H. Blattner & Sons, Inc., announced that it has achieved the number one ranking out of 407 companies in the annual Top Solar Contractors List by Solar Power World. The Blattner Family of Companies is honored to receive this top ranking within the industry. The full list of companies can be found here.

Although the COVID-19 pandemic is the immediate crisis unfolding at the moment, mitigating climate change is also an urgent issue. Solar PV installation is one way to help reduce greenhouse gases from fossil fuels. Solar Power World has recognized the efforts of solar contractors across the United States in its 2020 Top Solar Contractors list, where local solar installer Wells Solar & Electrical Services achieved a rank of 139 out of 407 companies.
