

24 volt lifepo4 battery

24 volt lifepo4 battery

24.0V Lithium Iron Phosphate (LiFePO₄) batteries available from Euro Energy in the UK, with capacities from 10Ah upto 100Ah. All batteries are fully compliant with UN38.3 testing requirements.

LiFePO₄ technology provides alightweight,higher capacity batterysolution, normally without the need for major testing and tooling investment. The technology is much safer than other lithium chemistries, and has a specific energy between that of nickel metal hydride (Ni-MH) and Lithium Ion. Safety is excellent, making it the battery chemistry of choice for many EV & HEV manufacturers.

Batteries can take the form of standard 'blocks' as shown on our website, & blocks can be combined to form custom battery assemblies, each containing a Battery Management System (BMS) to ensure safe charging and operation. If you would like to discuss a requirement for custom assemblies, please see thecustom battery packssection of our website. Alternatively, pleasecontact usfor futher assistance.

Battery Producer Reg No.: BPRN00823EORI Number: XI355306562000Global Location Number: 5060554170005MHRA Registration Number: 3083NCAGE Number: U6072Registered Number: 01576945VAT Number: GB355306562
