## 25 kWh battery storage

Introducing the Climastar HESS: The Future of Home Energy Storage Witness a revolutionary transformation in how you store and utilise energy in your household with Climastar's latest breakthrough: HESS, the ultimate home energy storage system.

Discover the potential of our state-of-the-art energy storage batteries, offering a flexible range from 5 to 25 kWh. Take charge of your energy consumption and embrace the wonders of sustainable living through our revolutionary home energy storage solutions.

With HESS, you gain full control of your energy expenses by optimising savings through the utilisation of the most cost-effective and eco-friendly energy sources available. Enhance your energy reserves with a Day/Night tariff or employ a Time of Use (ToU) tariff to procure energy at lower costs and utilise it to power your home during peak charging periods. Embrace the future of energy management with HESS.

Save with Climastar HESS without solar panels. Utilise off-peak tariffs or Time of Use rates to power your home and achieve excellent returns on investment. With a guaranteed 10-year lifespan and the fastest charge rate (1C), it's the smartest, most cost-effective energy storage solution. Suitable for indoor or outdoor installation with an IP65 rating. Discover Climastar HESS today!

Already harnessing solar power? Adding the HESS system will amplify your savings, seamlessly complementing your existing solar setup for even greater efficiency. Outperforming other alternatives, Climastar HESS is the go-to choice for forward-thinking homeowners like you.

At Climastar, we understand that no two homes are the same, and energy demands can vary significantly throughout the year. That's why we are proud to introduce the Climastar HESS - an innovative home energy storage system designed to cater to your unique needs.

On average, a UK household consumes around 10.2 kWh per day. With our HESS system featuring a 10-kWh storage capacity, you have the potential to slash your energy bill by up to 50% without the need for solar panels.

Our team of experts will conduct a comprehensive assessment of your energy consumption patterns and recommend the ideal storage profile tailored specifically for your household. We believe that energy storage should be a personalized solution, not a one-size-fits-all approach.

When you choose Climastar HESS, you are opting for a customised energy storage solution that perfectly aligns with your home's requirements. Experience the freedom of controlling your energy usage while enjoying significant savings on your energy bills. Let Climastar HESS be the right choice for your

## 25 kWh battery storage

home's energy future.

The HESS system offers a cost-effective and versatile solution for homeowners to reduce their energy costs. It allows users to maximise savings without solar panels, making it an attractive option for those who do not have solar panels or wish to complement existing solar installations. The ability to choose between Day/Night tariff and Time of Use (ToU) tariff empowers users to optimise their energy consumption and save money.

The Climastar HESS boasts a guaranteed minimum lifespan of 10 years and 10,000 cycles, making it more durable than many other batteries on the market. This longevity translates to more than 20% cheaper per lifetime kWh, providing users with a cost-effective long-term investment. Additionally, with the fastest charge/discharge rate (1C) available, the HESS system allows users to access more low-cost grid energy, further contributing to energy cost savings.

The Climastar HESS Smart Storage AI App provides users with advanced energy management capabilities. By analysing factors such as electricity prices, weather forecasts, and usage patterns, the app creates daily schedules to optimise the use of the cheapest and greenest electricity, leading to significant reductions in energy costs. The app's integration with a smart meter enables automatic drawing of electricity from the grid at the lowest rate, maximising cost savings.
