

## 3 phase inverter for solar panels

### 3 phase inverter for solar panels

The SolaX X3 PRO 12.0kW is a Three-Phase Solar Inverter designed for Large residential or commercial Solar PV systems with a 3-phase power supply. SolaX inverters offer market-leading performance, reliability, functionality, price and warranty.

SolaX Power's range of 3 Phase Solar inverters boast a wide MPPT voltage range to allow for more energy harvesting and have a maximum input voltage of 1100V, with a maximum efficiency of 98.5%.

The SolaX X3 PRO G2 is amongst some of the most efficient residential & commercial string solar inverters available on the market, boasting a massive 98.5% efficiency and with a maximum PV input voltage of 1100V, you can ensure that you are making the most out of your solar energy.

Note to end users: Can end-users purchase this product to save money on the cost of a replacement inverter? Yes, of course! Simply purchase the inverter and arrange for a local qualified electrician to install the unit for you (should be a 1-2 hour call-out). By sourcing the inverter yourself, you can make a huge saving on the prices quoted by installation companies for supply and fit services.

Growatt now have over 1.5GW worth of inverters installed worldwide and were the first inverter manufacturer to be awarded A+ rating by Photon. They also boast the highest ever inverter efficiency ever achieved (99.06% with the 20000HE model) and are constantly striving to reach higher efficiencies across their product range.

For monitoring you can add a ShineWiFi. Please note, the Growatt Installer Code Policy is being introduced in the UK and Ireland. It means all installers will need to register an "Installer Code" for using the Growatt monitoring platform. This installer code can be provided to the end user by the installer to allow for the viewing of your devices from your installer-level monitoring account. For more information, please refer to the following document: [Growatt Installer Code policy](#)
