

## 3000 watt solar package

### 3000 watt solar package

Start going solar today with a complete kit from That Solar Guy. If you want to add solar to your home and you don't have any shading issues, a central inverter provides the highest efficiency at a lower cost than micro inverters.

During our design conversations with you, we will determine the approximate lengths, then add a bit more to your spools. By knowing how much current has to be carried and how far, we can determine the proper gauge of conductor required. All your grounding wire is included as well.

The folks at That Solar Guy set themselves apart when it comes to the balance of system components included in their kits. Anyone can throw together some panels, inverters, and a combiner box and call it a kit; however, That Solar Guy's complete solar kits include absolutely everything you will need down to the conduit.

We hope you have had a pleasant shopping experience with Calpha. Our company is committed to achieving 100% customer satisfaction, even for return and refund issues. The detailed steps and explanations can be found as follows.

The customer will pay for the return shipping costs under any other conditions. Please note that Calpha does NOT accept any returns of modified products, because they are not suitable for resale. Calpha will have to ship it back to the customer, at the customer's expense. Refunds

All Calpha products purchased from Calpha or their official dealers come with a limited warranty (as shown below). This limited warranty covers substantial defects in workmanship & materials and, for some products, performance.
