

380 kWh energy storage battery products

380 kWh energy storage battery products

Compared with the traditional fixed energy storage power station, the energy storage container allows ocean and road transportation, with strong mobility and no geographical restrictions. The container can be loaded and unloaded from front, back, left and right and above, and is suitable for loading long and heavy items, such as heavy machinery, steel, wood, steel ingots, etc. The bench-type container is not waterproof, and the goods that are afraid of water cannot be shipped. If it must be shipped, it must be covered and sealed with canvas.

HyperCube II is a new-generation liquid-cooling outdoor energy storage cabinet suitable for energy storage, which features built-in safety and a long lifespan sides, as a battery storage cabinet with a maximum energy efficiency of up to 91%, HyperCube II ensures a reliable power supply for different C& I energy storage applications.
