

## 4 aa batteries

### 4 aa batteries

The AA battery is a standard size single cell cylindrical dry battery. The IEC 60086 system calls the size R6, and ANSI C18 calls it 15. It is named UM-3 by JIS of Japan. Historically, it is known as ...

It is significant since many battery-operated gadgets only require one size. A dry cell battery's normal size is AA or AAA, commonly used in low-drain electronic devices and gadgets.

The battery names AA and AAA are used to designate specific batteries' size and charge capacity. The biggest distinction between the two is their size. AAA batteries are smaller than AA batteries.

Manufactured specifically for industrial use, these Panasonic AA batteries are perfect for businesses and traders, and with stripped-back, bulk boxed packaging they are ideal for reducing waste. As part of the Panasonic Powerline range, these 1.5V batteries have longer shelf-life due to their low self-discharge rate.

To ensure you receive an answer to your question in the quickest time possible, we recommend you contact our customer service team directly using one of the following methods:

This pack of 12 Duracell Plus AA Batteries deliver reliable power for your everyday electronics such as digital cameras, electronic toys and flashlights. Ideal for keeping in storage and stocking up your home or office, these batteries can hold their power for up to 10 years without leaking.
