

400 kWh solar cell energy storage

400 kWh solar cell energy storage

SolarEdge Home inverters allow a DC oversizing rate of up to 200% and a SolarEdge Home Battery provides an ideal storage option for housing all that excess power in both on-grid and backup* applications.

SolarEdge Home Battery 400V is one of the first residential batteries to pass the strictest UL9540A unit level test for fire safety hazards, allowing convenient indoor installations.

Install the battery with our inverters, integrated Smart Modules with Power Optimizers and our growing family of smart energy devices. That means you'll have one single source for everything - products, warranty, support, training and system management.

Simple plug & play installation is made even easier with wireless inverter-battery communication and quick commissioning using SetApp wizard, saving installation time and reducing messy wiring.
