

# 4kw off grid solar system

## 4kw off grid solar system

This microinverter solar kit with 4 kilowatts (kW) meets the needs of homeowners looking beyond entry-level systems. Though it requires only 230 square feet of space, this kit produces 300 to 750 kW of energy per month. The power generated, which varies based on location, equipment and installation factors, could offset one-third of a medium user's consumption and reduce monthly energy bills by half.

10 tier-1 solar panels convert the sun's energy to electricity and come with 25-year warranties. Cut from a single source of silicon, monocrystalline solar panels are more efficient than their polycrystalline counterparts, blended from multiple silicone sources.

Wire, conduit, fittings, breakers, AC/DC Disconnects (if required), junction boxes and a sub panel (if required) can be purchased at any electrical supply shop, Home Depot or Lowes. Our technical support representative will provide a shopping list once your plans are complete.

If you're comfortable with reading and working from plans, diagrams and instructions, our DIY kits can cut your installation costs by as much as 60%. And, yes, you will still receive tax credits.

Another option is hybrid DIY installation where you do some, but not all, of the installation. Purchase the kit and ask for professional help when and where needed. If you reside in one of our service areas, we will be happy to refer you to installers. We can also help you determine which DIY approach is best for you.

Did you know? You can install a solar panel system with some help within a weekend or a few depending on your trade skills. Not up to DIY? Hire one of your trusted contractors to install for you.

If you're handy with tools, love learning new skills, or enjoy managing and completing projects, DIY solar installation could be ideal for you. Many DIYers take satisfaction in the process and are proud of the results!

GoGreenSolar is with you every step of the way during your installation. We're also the only DIY solar company with a money-back guarantee. If your permit isn't approved even after following our instructions we'll provide a full refund\*.

Some permit applications may require one or more plan revisions and resubmissions. Please supply us with all information necessary to make these revisions. Permit must be applied for with the city within 30 days of delivery of the permit package and any resubmissions must be resubmitted within 14 days of receiving the revised plans.

Our guarantee does not apply to installations on unsafe structures, unpermitted structures, ground mounts, structural engineering, structures not constructed to local building codes and other atypical building designs.
