

5 Best 12-Volt Golf Cart Batteries 2021 Review

5 Best 12-Volt Golf Cart Batteries 2021 Review

One of the most important parts of your golf cart is its battery. Despite its usually small size, your golf cart's battery significantly affects its performance and maintenance – since the golf cart usually requires reliable power over an extended period of time.

So, it's important that your cart's battery when necessary. In this post, we'd be looking at some of the best 12V batteries for golf carts. If you're looking for recommendations on 6V batteries for golf carts, check this review, instead.

No matter how long your golf cart batteries last, they will finally need replacing at some point. If you're at that point already, we've got you covered. We understand that choosing the right 12V golf cart batteries isn't so easy, considering the tons of options available on the market.

Featuring Sealed Lead Acid (SLA) and Absorbed Glass Matt (AGM) technology, the DCM0035 makes for one of the best choices when going for golf cart batteries. Its AGM and valve regulated technology eliminate spill, overpressure, and ensure that the battery delivers high performance at all times.

These features make maintenance very easy because you would be less worried about battery damage in storage, especially if you won't be using the battery very frequently. In fact, Interstate Batteries claims this battery is maintenance-free and spill-proof; considering it is a sealed lead-acid battery, you can count on the claim.

The DCM0035 battery is quite affordable. It comes with a power capacity of 12 volts 35 amp hours (35Ah). The battery measures 7.68 L x 5.16 W x 6.42 H inches and weighs 22.90 lbs. Its light weight is a significant advantage especially if you are planning on buying more than one for your golf cart.

The battery is also compact, user-friendly, and compatible with other machinery. If you're not going to use it in your golf cart very often, you could use it in various other applications like wheelchairs, electric scooters, marine/trolling motors, elevators, RVs, medical equipment, and solar/wind energy storage.

The DCM0035 battery works best in applications where it will be continuously discharged and recharged. When used in such applications, you will enjoy a long life for deep discharge usage.

Mighty Max is one of the industry giants known for top-quality batteries that offer high performance and can be used in many other applications apart from golf cart batteries. One of the company's high-quality models is the ML35-12.

5 Best 12-Volt Golf Cart Batteries 2021 Review

The ML35-12 is a Sealed Lead Acid (SLA) rechargeable battery and 100% maintenance-free. It is fitted with glass plates that keep the electrolyte solution contained. The entire battery is also completely sealed. This ensures that the battery is 100% safe, non-spillable, and maintenance-free. This also allows you to install the battery in several positions - right side up, on its side, or on its back (but never upside down).

The battery also features AGM technology which allows it to function properly in a wide range of temperatures, including low and high temperatures. It comes with a high discharge rate and a low self-discharge rate. This means the battery is less likely to get damaged while in storage. Also, you won't have to worry about recharging it right after use or charging it while it storage. All these impressive features make for deep discharge recovery and long service life.

In addition to all these, the battery features a rugged, sturdy build. This not only ensures that the battery lasts for years without wear or tear, but it also means that it would resist shocks and vibrations. The ML35-12 measures 7.68 x 5.16 inches x 7.13 inches and can be used in various applications besides golf carts. It comes with a capacity rating of 12 volts and 35Ah. This makes it compatible with other machinery including tractors, mowers, power chairs, and utility vehicles.
