5kva battery price

Victron Off-Grid Energy Storage System with 5kVA 48V Inverter, 10.2kWh Lithium Batteries, and (optionally) 5kW Solar Panels is backordered and will ship as soon as it is back in stock.

The Victron Off-Grid Energy Storage System features a powerful configuration, including a 5kVA Inverter, 10.2kWh LiFePO4 (LFP) Batteries, and (Optional) 5.0kW Solar Panels. The system comprises:

The 10.2kWh/5kVA LFP ESS is designed to efficiently utilise and manage electrical energy, offering a stable electricity supply and cost reduction opportunities, such as charging the battery during low-price night time hours. By integrating the ESS with solar panels, or generator, you can ensure continuous and reliable power supply for your home, operating 24/7.

The price includes a basic set of cables, protection disconnectors, and accessories required to create a fully operational system. User manuals and a connection diagram will be supplied with your order. Mounting not included - if you require a mounting system, select a suitable option here or contact us for advice.

The system must be installed by a licensed electrician or technician in compliance with all applicable regulations and guidance. For residential dwellings, guidance here must be followed.
