The Pod Point Solo 3S 7kW home charger provides a convenient and cost-effective way to charge your electric vehicle at home, whilst the 3-year warranty (covering both product and installation) guarantees peace of mind.

A future proof investment: Pod Point Solo 3S boasts an innovative solar-compatible design, seamlessly integrating with existing or future solar panel installations, allowing you to harness the power of clean, renewable energy for zero-cost and zero-carbon charging

If you'd like to find out more about our Pod Point range, take a look at our blog post "Why buy a Pod Point EV Charger?" - It's a comprehensive guide on all of the key features of your EV Charger including how much it costs per charge, specifications, commercial applications and charging speeds.

We're committed to providing great service for our customers, please view our [Reviews](#) page to see up to date feedback from verified Electricpoint customers. All of our reviews are provided directly from Feefo's review website to ensure unbiased, impartial reviews.

At EV PowerHouse we stock EV charging stations and cables that meet Australian standards. All our Home charging units come with an up to 3-year warranty period, and free shipping Australia-wide. Our goal is to make high-quality and user-friendly home charging units accessible to all EV owners, at an affordable price.

At EV PowerHouse we have a wide network of reliable, licensed electrical contractors in which we work alongside with. Whether it be a residential (both single or three phase), commercial, or solar integrated charging unit, our associated electricians are able to set it up!

If our installation service is of interest to you, please fill out the form provided and one of our friendly experts will email you a comprehensive installation quote within 1-2 working business days.

The Ohme Home Pro is a smart electric vehicle charger designed to make home charging simple and cost-effective. With a 7kW power output and a 5-metre tethered Type 2 cable, it offers fast and convenient charging for your EV. The charger integrates seamlessly with your energy tariff, allowing you to charge during off-peak times to reduce costs.
