18-bit SAR up to 300 ksps Unipolar differential analog input -VREF to VREF High linearity: DNL ± 0.6 LSB, INL ± 2 LSB THD: -110 dB SNR: 96 dB typical at 1 kHz SPI-compatible Daisy-chain operation is supported

Ultrasmall high-performance interconnects available in 8 shell sizes, 9-100 contacts and special power & coaxial arrangements. Offering exceptional bandwidth, durability against shock & vibration, custom, high temp & MIL Spec variants and Cannon-engineered Micro Twist Pin Contact System.

RM1A Series Zero Switching Solid State Relays are uniquely constructed to handle all resistive, inductive, and capacitive loads. Using direct copper bonding (DCB) manufacturing, the number of internal components and solder joints is reduced, resulting in a prolonged life and better heat transfer.

The SMPM series from TE is an extension of the sub-miniature push-on micro (SMPM) connector RF product line. SMPM connectors provide a micro-miniature connector interface with a frequency range of up to 65 GHz. Combining compact size and a convenient snap-on mating interface.

Rated currents from 25 to 63 A Up to 600 VAC and VDC 2- and 3-wire configurations Horizontal and vertical PCB mounting types Ruggedized saturation and thermal behavior Open construction for forced and convection cooling

Schneider Electric's TeSys giga motor control series includes contactors & overload relays. Giga is designed to switch & protect motors between 75 HP & 700 HP 480 V & other electrical loads up to 900 A in an electrical control panel, with SCRs up to 100 kA 480 V with circuit breakers.

Easy to install. Easy to operate. The one photoelectric proximity sensor for all applications. This sensor has it all with ease of use, a sturdy design, and ability to accurately detect objects in even the most demanding of environments. See how it can be the solution to your sensor needs.

The MPS MPQ5872-AEC1 is a smart high-side load switch for nominal 2 A loads. The device features an input voltage (VIN) as low as 3.5 V and can withstand load dumps up to 42 V.

Design delivers superior signal integrity and high resistance to vibration. Ideal for applications where space is at a premium. Voltage up to 300 V for 2.00 mm, 2.54 mm, and 5.08 mm (custom) pitches.

Avoid cable failures and machine downtime with Belden's MachFlex series of industrial cables. Designed for the rigors of light to continuous motion applications, MachFlex can help eliminate the unexpected and expensive downtime caused by insulation abrasion, shield degradation, and torque failures.

The 4000 series is our most compact and adaptable circular connector yet. Featuring a durable Valox PC/PBT construction and a quick-turn bayonet coupling system, this miniature sealed connector is ideal for a wide range of industries that demand quick, dustproof, and watertight power connections.

Ensure the safety of operators and equipment with consistent, reliable, and controlled responses using the most comprehensive range of safety-compliant emergency stop, stop switches, and accessories. Get dependable performance in harsh, industrial environments.
