

Aaa battery review

Aaa battery review

We have extended our standard returns policy for the festive season. Items bought between 1st November and 31st December 2024 can be returned until 31st January 2025 if unwanted or unsuitable.

If you decide to cancel and return the goods, then you should put this in writing, either by letter (proof of posting or recorded delivery is advisable) or you can fax or email. A telephone call is not sufficient. The cost of the postage back to Castlegate Lights is your cost and will not be paid by Castlegate Lights.

Our site uses the latest 128 bit SSL security, complying with and exceeding all necessary security requirements to protect your details. We do not store any sensitive information (card number, etc).

SSL encrypts your order online to avoid any decoding of that information of anyone other than the necessary processing parties. To check the security of your connection, look at the status bar of your browser window after accessing the server. If you see an unbroken key or a closed lock then, depending upon your browser, SSL is active. You can also double check by looking at the URL line of your browser - while accessing a secure server the first characters of the address will change from HTTP to HTTPS.
