The most popular battery sizes for tiny household electronics are AA and AAA. These batteries have a nominal voltage of 1.5 volts and are cylindrical. AAA batteries are physically smaller than AA batteries and contain around half the capacity.

The most common battery sizes are AA and AAA, measuring 5.0 cm x 1.4 cm (1.97" x 0.55") and 4.4 cm x 1.05 cm (1.73" x 0.41") respectively, with weights of 23g and 11g, equivalent to 0.81 oz and 0.39 oz. These batteries are commonly used in devices such as flashlights, remote controls, and other portable electronics

Generally, the larger the battery is, the more capacity it has for energy storage. So even though a big and small battery are rated at 1.5V, the big battery stores more energy and provides a longer battery life.

No matter the technology or material (like alkaline, nicd, nimh, lead, lithium, lithium ion) inside a Battery there's one common factor: All common battery types have a standardized format

Button cells, also known as watch batteries, coin batteries, or small single-cell batteries, have a squat cylindrical shape and are typically 1 to 6 mm (0.039 to 0.236 in) high and 5 to 25 mm (0.0197 to 0.984 in) in diameter, resembling a button. Battery cells do not come as rechargeable batteries.

In a four digit code, the first two digits or merely the first digit in a three digit code represent the diameter in millimeters. The battery's height is represented by the last two figures in tenths of a millimeter.

I got these free to review. I'm trying to help the environment by using rechargeables & these are also made from recycled batteries so it was a good start. Handy that they worked straight from the packet so no need to do any charging cycles. Working great so far in the kids toys. Packaging was minimal which was another plus.

I was sent these batteries free of charge in exchange for a review. After continually buying and disposing of batteries, this is a great idea. They recharge quickly and this makes them a very competitively priced option to disposable batteries.

I am reviewing this product as I received a free sample from Ocado. They come pre-charged and ready to use. Seem to work great and I am wasting less as I can recharge them when they die. Great concept.
