Accra energy storage applications

MINAGIE Energy is all about providing clean, affordable, and reliable electricity to underserved communities in Sub-Saharan Africa. We specialize in wind energy generation. Our flagship products are the GENESIS-Wind and TIDAL wind turbines. The GENESIS-Wind turbine is an AI-powered shrouded wind turbine designed to harness wind from all directions, making it efficient even in areas with low and inconsistent wind patterns.

We target rural households, small businesses, schools, and healthcare facilities--places that desperately need reliable electricity to improve their quality of life and driv...

Market Analysis:At Ajen Kotoku where the project will be situated, the market analysis shows that there is a very high potential for the project and demand for the products since no gas station is situated there yet since the last feasibility study had been done.

Gas App provides real time, accurate LPG level readings using proprietary smart gas monitors and smart leakage detectors. Users can monitor LPG ratings from any location and on any device. After getting a notification from the smart app, a user can automatically get a filled LPG cylinder delivered directly at their doorstep. The company aims to address the issues of customers running out of gas without notification, as well as environmental issues such as fire outbreaks and gas explosions caused by LPG leakages contributing significantly to climate change.

Eddievolt is a Ghanaian technology startup revolutionizing mobile device charging with eco-friendly, solar-powered charging stations strategically placed in high-traffic areas.
