

Afghanistan electric vehicle policy

Clean cars, hidden toll. Rich lode of EV metals could boost Taliban and its new Chinese partners. The Pentagon dubbed Afghanistan "the Saudi Arabia of lithium.". Now, it is American rivals ...

The global race for lithium, a crucial component in electric vehicle (EV) batteries, has shifted attention to Afghanistan, hailed as the "Saudi Arabia of lithium." As China dominates the EV market, Afghanistan's vast lithium deposits have become a geopolitical focal point.

In a new article for The Washington Post, Gerry Shih and Lorenzo Tugnoli explored the way that this could alter the economic and political fortunes of one country that's home to significant deposits of lithium and other minerals used in the making of electric vehicles. The country in question is Afghanistan -- and that's where the ...

The COP29 meetings mark an important first step to ensure that environmental factors in Afghanistan remain a tentative means of engagement with Taliban. ... \$2.36 billion electric vehicle ...
