Afghanistan manufacturing energy storage

One of the largest off-grid solar systems in the world, producing 1 MW of power, this vast PV array coupled with advanced lead battery energy storage, is located in the mountains of Bamyan, Afghanistan, famously known for its Giant Buddha statues.

Part of the Renewable Energy Program funded by New Zealand's government, the project provides 24-hour power to 25,000 homes, businesses, hospitals and government officers for this central mountainous region.

Involving a mix of solar, lead battery storage and diesel backup, the renewable energy project provides sustainable and cost-effective electricity to local people. Prior to installation, residents relied on small diesel generators, domestic solar panels or no power at all.

Crown has 12 sales and distribution offices throughout North America, 600 employees and a network of authorized business partners, distributors and dealers throughout the Americas, Europe, Africa, Asian-Pacific, Australia and New Zealand.

Crown's operating principle - "The Power Behind Performance" - represents Crown Battery's commitment to providing power to millions of people around the world - power that makes life easier, and raises standards of living, health and safety for the communities we serve.

Afghanistan Battery Energy Storage market currently, in 2023, has witnessed an HHI of 8468, which has decreased slightly as compared to the HHI of 10000 in 2017. The market is moving towards highly concentrated. Herfindahl index measures the competitiveness of exporting countries. The range lies from 0 to 10000, where a lower index number represents a larger number of players or exporting countries in the market while a large index number means fewer numbers of players or countries exporting in the market.
