Amman enphase energy

Founded in 2006, Enphase transformed the solar industry with our revolutionary microinverter technology, which turns sunlight into a safe, reliable, resilient, and scalable source of energy to power our lives. Today, our intelligent microinverters work with virtually every solar panel made, and when paired with our award-winning smart battery technology, they create one of the industry's best-performing clean energy systems.

The Enphase Energy System helps people make, use, save, and sell their own power. This includes our industry-leading app, which provides unprecedented data and control in the palm of your hand. For the first time in the evolution of our centuries-old grid, people can get paid for the clean energy they produce and share with their communities and build a new energy future that harnesses the sun. This clean, free, abundant source of energy can power our lives and ultimately help replace fossil fuels altogether.

Today, if you see a home with solar panels on it, there's a good chance it's an Enphase home. We have installed more than 52 million microinverters on over 2.7 million homes in over 145 countries, helping millions of people gain access to clean, affordable, and reliable energy while creating good jobs and a more carbon-free future for everyone. Enphase is putting people and their power at the center of our shared energy future.

Enphase Energy, Inc. is a global energy technology company and the world's leading supplier of microinverter-based solar-plus-storage systems. The Company delivers smart, easy-to-use solutions that connect solar generation, storage, and energy management on one intelligent platform. Its semiconductor-based microinverter system converts energy at the individual solar module level and brings a system-based high-technology approach to solar energy generation, storage, control, and management.
