

Armenia plug-in electric vehicles phevs

For more than seven decades, Land Rover has challenged what's possible. Today, electric power enhances the world's most capable and luxurious SUVs with improved levels of sustainability, responsiveness and refinement.

Wherever adventure leads you, life with a Land Rover plug-in electric hybrid (PHEV) is boundless. By driving in full Electric Vehicle (EV) mode on shorter trips and switching to your petrol engine for longer journeys, no distance is ever off limits.

?EV range figures are based upon production vehicle over a standardised route. Range achieved will vary dependent on vehicle and battery condition, actual route and environment and driving style.

*The figures provided are NEDC2 calculated from official manufacturer's WLTP tests in accordance with EU legislation with a fully charged battery. For comparison purposes only. Real world figures may differ. CO2, fuel economy, energy consumption and range figures may vary according to factors such as driving styles, environmental conditions, load, wheel fitment and accessories fitted. NEDC2 are figures calculated using a Government formula from WLTP figures equivalent to what they would have been under the old NEDC test. The correct tax treatment can then be applied.
