

# Baku panasonic solar panels

Baku panasonic solar panels

The project is expected to generate 500,000MWh electricity and supply enough clean energy to power 110,000 households. The project is expected to offset 200,000t of carbon dioxide emissions (CO2) a year. The project cost is expected to be around \$200m.

All power projects included in this report are drawn from GlobalData's Power Intelligence Center. The information regarding the project parameters is sourced through secondary information sources such as electric utilities, equipment manufacturers, developers, project proponent's - news, deals and financial reporting, regulatory body, associations, government planning reports and publications. Wherever needed the information is further validated through primary from various stakeholders across the power value chain and professionals from leading players within the power sector.
