Baku school energy storage

The 17th Baku Summer Energy School is jointly organized by the Institute of Development and Diplomacy (IDD) of ADA University, the State Oil Company of Azerbaijan (SOCAR), bp Azerbaijan, Kolin, TotalEnergies and Masdar, Azernews reports, citing IDD.

A total of 56 people are involved in the program. Of which 32 participants represent 13 countries - Azerbaijan, Turkey, the United States, Great Britain, Italy, Spain, Hungary, Bulgaria, China, Japan, Kazakhstan, Saudi Arabia, and Nigeria.

During the opening ceremony Rector of ADA University Hafiz Pashayev, Deputy Energy Minister Elnur Soltanov, SOCAR President Rovshan Najaf and bp Regional President Gary Jones welcomed the participants.

"People with the necessary experience in this sphere have gathered here, and the popularity of this school is growing. Generally, today Azerbaijan has a huge history of oil and gas production," he adds

Another speaker, Regional President Gary Jones, sharpened his focus on this. He noted that what started as just a conversation about oil and gas extraction in the Caspian Sea has now turned into a long and very interesting "journey". Today energy is an important part of Azerbaijani life and the country's partnership with international oil and gas companies, including BP, he added.
