The Reteti Elephant Sanctuary is situated in the remote Mathews Range, among Kenya's second largest elephant population. It takes in orphaned and abandoned elephant calves with an aim to release them back into the wild herds adjoining the Sanctuary. This is the result of a widely recognised and expanding grassroots movement of community-driven conservation across northern Kenya; a movement that is growing new economies, transforming lives and conserving natural resources.

ABM (Associated Battery Manufacturers) is the leading battery manufacturing company in Central and Eastern Africa, and the only battery manufacturer in Kenya. Specialising in the production of solar batteries and automotive batteries, we uphold stringent standards to ensure product quality and reliability. Our offerings include vented and maintenance free variants, catering to diverse customer needs.

We have established ourselves as a leader in the battery market by fostering strategic partnerships with various leading companies across the region. These collaborations enhance the accessibility of ABM's products, encourage innovation and bolster distribution networks.

With a focus on innovation and customer satisfaction, we continually invest in research and development to stay at the forefront of battery technology. Through continuous improvement and adaptation to market demands, ABM remains agile in meeting the evolving needs of our customers across different industries.

Our commitment to quality, reliability, recycling and customer service has solidified our position as a trusted provider of batteries, serving both domestic and international markets for decades.

ABM offers white label operations to allow clients to customise battery manufacturing under their brand. These contracts use our considerable expertise and infrastructure while maintaining clients' brand identity.

We collaborate closely to develop tailored solutions across automotive, solar, and industrial batteries, enabling clients to expand their product offerings efficiently and cost-effectively. This approach fosters partnerships and positions ABM as a trusted ally in the battery market, facilitating business growth and innovation.

Equipped with advanced technology and automated systems, our computerised processes ensure precision engineering and optimal efficiency in battery production from the most cutting-edge battery manufacturing plant in Africa.

ABM's commitment to sustainability extends to recycling lead and plastic materials from old batteries. Through our recycling efforts, lead is smelted, purified, blended, and cast into ingots before being re-smelted to create grids and lead power.

Founded in 1995 as a pioneer in battery technology, BYD's mission is to change the world by creating a complete, clean-energy ecosystem that reduces the world's reliance on petroleum. BYD's innovative products are leaders in multiple sectors, including battery-electric automobiles, buses, medium- and heavy-duty trucks and forklifts; the SkyRail monorail system; solar power generation and energy storage systems; and consumer electronics.

BYD North America's headquarters is located in Downtown Los Angeles, with a 450,000-square-foot bus manufacturing facility in Lancaster, California. BYD employs over 750 workers in the United States.

BYD is the only electric bus manufacturer with a unionized workforce (SMART Local 105) and a Community Benefits Agreement establishing training and apprenticeship programs for workers with traditionally high barriers to employment, and mandating diversity in hiring.
