## Best portable solar panels 2021

If you want a power supply in an area where no plugs are the norm, you want the security of knowing you can charge your cell phones or keep your food cold. In the olden days, this meant buying a gas-powered generator and conserving fuel, just in case. The great news today is that you have renewal, plentiful power sources to rely on instead.

The included charge controller has two USB ports for direct connect to USB-corded devices. If you want an easy system to set up and a lightweight package to carry, this DOKIO can meet an array of your powering-up needs.

Panel style: FoldableWhat it runs: 18V battery.Storage size: 47?EUR x 22?EUR x 2?EURSurface area: 43?EUR x 20?EURWattage output: 100WWeight: 16.5 lbs.Durability: AIf you want a portable system with USB outputs this Jackery panel is the thing for you. The kit includes a carrying bag on the back.Built with efficiency in mind, this panel reports to produce 23% more energy in hot weather.

Panel style: FixedWhat it runs: 12V batteryStorage size: 47?EUR x 22?EUR x 2?EURSurface area: 43?EUR x 20?EURWattage output: 100WWeight: 16.5 lbs.Durability: AIf you want a portable system you can add on to as your needs grow, this Renogy gives you a terrific base to begin. The starter kit includes a charge controller, ground rod, and 8-foot cables to reach your battery. Brackets allow you to mount the panel if you wish, or it can be deployed on its own at a distance with the 20-foot connector.

Panel style: SuitcaseWhat it runs: 6- or 12-volt battery, or direct SAE portStorage size: 35?EUR x 22?EUR x 4?EURSurface area: 33?EUR x 40?EURWattage output: 120WWeight: 32.0 lbs.Durability: BIf you want to run your solar power directly into your camper for your small appliances, this could be the portable panel set for you. It folds into a slim-depth suitcase, included with your kit. Users note that it can feel cumbersome because it is so heavy.

Flexibility is one of the things that sell people on the Zamp system. Besides running the power directly into the vehicle, it can charge a 6- or 12-volt battery for round-the-clock use. Direct sun for prolonged periods works best for full battery charges.

Users note that the attached charge controller has no user-defined settings; a green light indicates it is functioning. Some people add on an inexpensive controller to adjust voltage flow. If high efficiency and reliable heavy duty wiring give you piece of mind, this solar panel setup will keep you satisfied for years to come.

Panel style: FoldableWhat it runs: USB port + 12V portStorage size: 10?EUR x 7?EUR x 1?EURSurface area: 8?EUR x 10?EURWattage output: 7WWeight: 0.8 lbs.Durability: BDesigned originally for as a supplemental
