

Bishkek retail store energy storage

Due to the increased demand for reliable and safe warehouses in Bishkek, the company's management decided to expand the warehouse to old Soviet-style buildings, which used to be a confectionery factory. The building needed complete reconstruction to meet high international standards for storage conditions of goods, as well as with regard to energy resources use.

In 2018, the company approached KyrSEFF for a loan and for consultation services. KyrSEFF's engineers and financial experts analyzed the planned investments, focusing on the energy saving potential, technical and financial parameters, and environmental aspects. The partner bank, KICB, then approved the project plan for the modernisation of the building.

KyrSEFF consultants have estimated that as a result of the \$467,000 investment in the renovation project of the old building, the new logistics center will save 456 MWh of energy and reduce CO2 emissions by 20.6 tonnes annually. The total energy savings will amount to US\$ 9,730 per year. As a reward for the successful implementation of resource saving measures, Smart Logistics will receive a grant of US\$ 70,040 from the European Union.

"Thanks to the KyrSEFF loan and the related investments, we can provide a full range of third party logistics services: delivery, targeted storage, and warehousing to supply chain management", said Aliakper Gabibov, CEO of Smart Logistics.

Today, the 8,000 m² warehouse is fully computerized and needs to be serviced by no more than 50 people. The room has 5 sections for storing goods of different sizes, as well as a mezzanine room for the safe storage of pharmaceutical products and small valuable objects. The company has the opportunity to receive goods by railroad tracks, and unload 8 trucks at the same time.

The Kyrgyzstan Sustainable Energy Financing Facility (KyrSEFF) was developed by the European Bank for Reconstruction and Development (EBRD) and established in 2013, with a total portfolio of US\$ 55 million. To reward the successful implementation of energy saving measures through KyrSEFF, beneficiaries receive grants ranging from 10 to 35% from the total investment, and free technical support financed by the European Union (EC-IFCA).print

BishkekPark, the first and largest shopping center of Kyrgyzstan, is a living complex with nearly 100 stores, more than 20 caf   restaurants and a large indoor parking lot, including leading names in the world of fashion, supermarkets and technology.
