Buy energizer batteries

Not a single battery was working! Absolute rubbish! I bought this bundle pack thinking when there was an offer, but they were not working! Absolute rubbish! Waste my money !Thought it is the big brand battery bought from the big brand supermarket, they should be working fine. disappointing battery brand let me down !!! SHAME ON YOU!!

I bought this bundle pack thinking I could have more twinkly lights at a value price etc. what a total let down and waste of money total false economy!!! Not all of the batteries worked - waste of money. The ones that did work lasted a few days - waste of money. When you think you are getting a bargain think twice this is the second time this disappointing battery brand let me down !!! SHAME ON YOU!!

Only 3 of this pack worked so not the good value I thought I was getting to use in a small portable radio. Did not bother to ask for a refund as it is hard going with Ocado, they would probably ask me for a photo or something! Buyer beware.

The Energizer MAX 303328000 / AAA Alkaline Batteries are designed to last much longer than standard batteries and totally mercury-free. Powerseal technology protects your devices against damaging leaks for up to 2 years. The batteries will hold power for up to 10 years in storage. Suitable for everyday use in toys, smoke alarms, clocks, remote controls etc.

I am reviewing this product because I received a free sample from Ocado &#x27;s a battery so what is there really to say other than it works well in the remote how long it will last who knows but I usually get very good use out of Energizer batteries.
