The Whirlpool 6TH SENSE UW8 F2C XB UK 2 Freestanding Freezer is a modern appliance designed to provide convenience and freshness for your frozen goods. This special storage compartment is designed to hold bottles securely and prevent them from rolling around or getting lost among other items in the freezer. It allows you to organize your frozen beverages efficiently.

The inclusion of an antibacterial filter is a valuable feature in a freezer. It helps maintain a hygienic environment inside the appliance by reducing the presence of bacteria, thus ensuring the freshness and quality of your frozen food items. The 6th SENSE FreshControl is an exclusive technology by Whirlpool is a smart system that automatically monitors and adjusts the temperature and humidity levels inside the freezer. By doing so, it optimizes the conditions for preserving your food, ensuring long-lasting freshness and preventing freezer burn.

Overall, this Whirlpool freezer is designed to provide peace of mind and convenience, with features that enhance the quality and longevity of your frozen items. Whether you need to store frozen foods, beverages, or other perishables, this appliance aims to keep them fresh and safe for consumption.

Total No Frost Technology This system produces cold air in the freezer section then evenly distributes it in the fridge cavity with the help of the multiple jets on the No Frost panel at the rear of the fridge cavity. The temperature and humidity in the fridge will remain constant and therefore keep your food tastier and fresher for longer. The Total No Frost system does not produce any frost in the freezer section and therefore there is no need to ever defrost your freezer.

Experience unmatched freezing efficiency with the Bosch GSN36VWEPG Series 4 Free-standing freezer, featuring the revolutionary NoFrost technology for consistent freezing temperatures without the hassle of defrosting.
