

# Buy used batteries

## Buy used batteries

2 Volt traction cells can be used in many different heavy industrial electrical applications including forklifts, trucks, large industrial cleaning machines, tower wagons and more.

The power-management IC used on Raspberry Pi 5 integrates a real-time clock and charging circuitry for these button cells, which can power the clock while mains power is disconnected, and will also recharge the battery when power is connected.

Lithium Battery Shipping: Due to courier restrictions, this product can only be shipped within England/Wales. With this item in your cart, your shipping options will be limited to DHL. Why?

The REC range of batteries for cyclic applications. The low maintenance and valve regulated construction combine with heavy duty plates and innovative separator systems to make the REC range a premium high reliability cyclic battery.
