

Car and Driver battery life

We stock 1000's of car batteries and whether you are looking for a car battery suitable for your start stop vehicle or you know the specific UK Part Code of your current battery, we will have a battery to suit your vehicle.

Always check your registration number, current battery size dimensions and the CCA rating of your existing battery before purchasing a battery you think might fit. If you are unsure on the fitment of your new car battery, contact us and we will be able to assist you in finding your new car battery.

Make sure that you always, at the very least, buy like for like batteries, or you upgrade to an AGM from EFB or standard lead acid batteries. If you are unsure of your current vehicle battery or your specification needs, please contact us and one of our battery experts will help you find your new start/stop battery.

Our range of battery accessories will help to improve the life and quality of your battery and keep your vehicle on the road. From terminal clamps to vent tubes, we have a wide selection of accessories for your car and vehicle batteries.

There are 3 different type of battery used within cars, standard lead acid batteries, EFB batteries and AGM batteries. Each of the different battery types offer a varied level of performance.

AGM and EFB batteries are suitable for vehicles with higher power demands and new vehicle technologies such as parking sensors, heated seats and start/stop. Standard lead acid batteries are most suited for non start stop vehicles.

Make sure that you replace your battery with at least like for like, if you downgrade your battery, you could find that your battery fails very quickly or that certain features in your car do not work properly.

Car battery chargers, are an essential piece of equipment for any motorist. They are great for when the car battery is not performing at its optimal level, or for if you have a car that you do not use regularly, or you do frequent very small journeys.

Standard lead acid batteries are traditional car batteries and the most common type of battery found in cars and vans. They are durable and dependable and are great for vehicles that do not have start stop technology and for vehicles with low power demands.

Dan Edmunds was born into the world of automobiles, but not how you might think. His father was a retired racing driver who opened Autoresearch, a race-car-building shop, where Dan cut his teeth as a metal fabricator. Engineering school followed, then SCCA Showroom Stock racing, and that combination landed

him suspension development jobs at two different automakers. His writing career began when he was picked up by Edmunds (no relation) to build a testing department.rn

Dan Edmunds was born into the world of automobiles, but not how you might think. His father was a retired racing driver who opened Autoresearch, a race-car-building shop, where Dan cut his teeth as a metal fabricator. Engineering school followed, then SCCA Showroom Stock racing, and that combination landed him suspension development jobs at two different automakers. His writing career began when he was picked up by Edmunds (no relation) to build a testing department.
