

# Car battery 3 year warranty

## Car battery 3 year warranty

The guarantee period of 3 years starts from the date of fitment and is only valid for the vehicle that the battery has been fitted to. Before the battery is fitted, a Bosch Car Service technician will inspect the charging system on the vehicle to ensure it is working correctly. If there is an issue with the charging system then authorisation must be given to the Bosch Car Service garage to repair the charging system before the Bosch battery is fitted for the guarantee to be valid.

In order to make a claim under this guarantee, the vehicle should be taken to any Bosch Car Service in the UK together with the warranty folder containing the purchase invoice for the battery and the battery test report from when the battery was fitted to the vehicle. The Bosch Car Service garage will replace the battery free of charge subject to these guarantee conditions.

Did you know that modern vehicles are equipped with more and more components running on electrical energy? They need to be supplied by reliable sources of energy with high performance. Equipped with modern technology and featuring a corrosion-proof design. Bosch batteries provide different types of vehicles with the energy they need - over long periods.

At ATS Euromaster we stock a wide range of van and car batteries so you're never caught short without one. We're always on hand to provide and fit a replacement car battery for your petrol or diesel vehicle.

Our new car batteries are available to buy online and can be fitted at a date and time that suits you at one of over 235 local ATS centres. With our handy search tool above, you can find your correct car battery by reg. Simply enter your vehicle registration number and book a car battery fitting near you.

We also have a range of batteries suitable for hybrid and electric vehicles. If you can't find a battery suitable for your car using our registration look up tool, please contact your local ATS centre.

Responsible for 60,000 roadside recovery call-outs a year, battery failure is a common cause of breakdown in petrol and diesel powered vehicles. There are a number of reasons why a car battery could fail, including extreme weather conditions, the car being left for long periods, the age of the battery and, commonly, motorists accidentally leaving their lights on.

The average lifespan of a car battery is between 3 and 5 years, but this can vary based on a number of factors. These include how often and how long the car is driven, temperature variation, the age of your car and any additional electronic features installed (including alarms and sensors) that are active even when your car is not in use.

## Car battery 3 year warranty

There are different types of car battery available because different cars have varying power needs. We stock a range of different car batteries so that you can find the right replacement for your vehicle.
