

Car battery reviews and reviews

Without a functioning car battery, the starter motor and ignition system won't get the required current needed to start the car. Therefore, when it comes to replacing your battery, it's important that you choose the right one and below are some of the best.

If you require a quick answer, the best car battery is the Bosch S4 096. It's a direct OEM replacement that's backed by an impressive 4-year manufacturer's guarantee and is also suitable for a variety of cars. However, if you require additional power, the Yuasa YBX9000 is the best option that's rated at an impressive 95 Ah.

To rate the car batteries within our roundup, we based our recommendations upon our experience and testing of multiple batteries, plenty of research and several factors. Some of the factors that we considered included the brand reputation, capacity, service life, carry handles, terminals, warranty and value for money.

By far the most popular car battery on the market is the Bosch S4 096, which according to the brand is up to 2 times more efficient than standard batteries. It's suitable for the majority of vehicles on UK roads but it's advised that you check the size and battery terminal locations beforehand.

The Bosch S4 continues to dominate in the UK and it's one of the best car batteries on the market that's backed by a reputable brand. Although more expensive than some of the alternatives, it's worth the extra and it even comes with a 4-year guarantee for complete peace of mind.

Another popular and more affordable car battery is the Varta Blue Dynamic C22 model. It's a German-made battery that's designed to be a "like-for-like" OEM replacement that meets all of the required OEM criteria.

The Varta Blue Dynamic C22 is an excellent all-round car battery that's ideal for small cars that require a replacement. As with the Bosch battery above, this cheaper alternative also comes with a 4-year warranty as an added bonus.

If you require additional starting power and performance for more powerful or larger vehicles, the YUASA YBX9000 is a great option. It's designed specifically for high power demands and the brand even states that it can provide up to 360,000 engine starts, which is very impressive.

The YUASA YBX9000 is a high-performance battery that's built to the highest of standards and won't disappoint. It's a great OEM replacement that packs plenty of power and also comes with a 4-year warranty for complete peace of mind.

The Exide 096 AGM is a direct competitor of the Bosch S4 and it's designed to cope with the increasing use

of comfort electronics that come with modern vehicles. In terms of its performance, the brand states that it has a capacity of 70 Ah and cold-cranking amps rated at 760 CCA.

Overall, it's a powerful car battery that's built to a high standard and provides improved starting performance for stop-start cars. However, the premium price tag makes it a less attractive option when compared to the Bosch S4 alternative.

One of the most expensive car batteries in this article is the Bosch S5 and it's the brand's flagship model. Bosch state that it's suitable for all vehicles equipped with start/stop systems and it provides up to 3 times more efficiency when compared to standard car batteries.
