Gas prices may no longer be at their peak, but they remain higher than levels seen last year. And with inflation continuing to take a bite out of budgets elsewhere, finding cheap gas is a priority for many consumers.

Searching for the cheapest gas near you no longer requires wasting gas driving around to find the best price. There are now dozens of apps that do the legwork for you. Many of them compile gas price data in real time for users, allowing you to shop around for gas straight from your phone.

Gas apps are the easiest way to find cheap gas--and they require little commitment compared to loyalty programs that limit you to a single fuel brand. While deciding which gas app to use, characteristics such as cost, membership benefits and how the app makes money can help you make an informed decision about which is best for you.

GasBuddy is one of the most well-known apps to maximize your gas savings. The app allows users to search for gas prices by their current location, ZIP code or city. It offers a free rewards card for users that gives you discounts as much as 25 cents per gallon and links directly to your checking account to pay for gas.

The Fuel Insights feature offers helpful visualizations, including a regularly-updated average price in your state, county or metro area. If the Fuel Insights tool says that the average cost of gas in Orlando is \$3.84, for instance, you'll think twice before stopping at an Orlando gas station charging \$4.15 a gallon.

Kelly Anne has over six years of experience with reporting and editing in the personal finance space. Her work has been featured in national publications including Reader's Digest, CNBC and Forbes. She has a background in business education and a master's degree in international communication studies.

Residents and business owners in the Atlanta Gas Light Company (AGLC) service area can choose their natural gas provider to find cheap natural gas prices in Georgia. Based on the latest data from the Energy Information Administration, the average residential natural gas rate in Georgia is \$38.85 per thousand cubic feet.

Before deregulation, Georgians were limited to receiving their natural gas from their utility company, which would charge a single price. The deregulated market allows you to compare Georgia natural gas rates and choose the best gas company and plan for you.

As you shop for natural gas rates in Georgia, you may notice different plan types. The most common types of

# Cheapest gas company

natural gas options are fixed-rate and variable-rate plans. Here's what that means.

If you choose not to purchase your natural gas from a supplier, you'll automatically be enrolled in a standard rate from a default company called the Price to Compare (PTC). However, this default rate isn't always the lowest price, so it can be worth shopping around to find the best Georgia natural gas rates.

Georgia's main natural gas distribution utility is Atlanta Gas Light Company, which provides service to more than 1.6 million residential and commercial customers. The utility company delivers natural gas to its customers and maintains infrastructure.
