

Chinese inverter generator

Chinese inverter generator

BISON inverter generator series is the result of the evolution of previous models, and has been improved based on more than five years of experience. We have a series of sixteen enclosed silent inverter generators and seven open-frame inverter generators. Cover the power range you need, from 1000W to 7500W. BISON inverter generators can use popular fuels such as gasoline and diesel, as well as various options such as propane gas and dual fuel.

" A very beautiful generator is a frequency conversion generator. Low noise, sufficient power, easy to start, light weight and reasonable price. A variety of voltage outputs can be used for different electrical appliances. The after-sales service is in place, the follow-up is in place, all questions are answered, patient and meticulous, and the attitude is very good! So far, no problems have been found. We look forward to long-term cooperation. "

" Our customers received the goods and said that the packaging was very tight, the generator was intact, the machine performance was very good, and the start-up was very simple. It was started as soon as it was pulled. The materials were good, made of all copper, the design was humanized. After a simple test, it was easy to use and low fuel consumption. "

Both inverter generator and traditional generator are devices that convert mechanical energy into electrical energy. In this way, it can be used as a source of energy supply when our home or business grid collapses. Inverter generators also use fuel as a power source, and the type of fuel depends on each model. They usually have a fuel gauge to display the amount of fuel, and an overheat indicator to know when the engine is above its acceptable temperature.

Compared with the traditional generator, its main difference is the power generation process. There are more steps when the inverter generator generates electricity. The energy produced is safer and more reliable because the current has almost no fluctuations. Therefore, it is very suitable for powering more sensitive devices such as computers, TVs, household appliances and mobile phones.

Fortunately, BISON will be here to help you solve your problems. We have a wide range of inverter generators, ranging from 1250 watts to 5000 watts. China BISON is a professional inverter generator factory&company. Wholesale best inverter generator at a competitive price.

Inverter generators can be light, heavy, or equipment installed in recreational vehicles (RV). Inverter generators are usually the first choice for daily power generation because they run quieter than traditional generators and help protect electronic equipment, precision equipment, etc.
