

Chins 200ah battery review

Chins 200ah battery review

In this video, I test, teardown, and review a pair of economically priced off-grid power products sold through Amazon. A 200Ah LiFePO battery from Chins and a 1500W pure sine wave inverter from ALFFAA.

Overall they appear to be fair value for the money, but not without a few drawbacks you'd expect at the lower end of the market price-wise. Below are my review pros and cons of both items.

This video provides a quick update on the ALFFAA 1500-watt inverter. Recently I found out it can't power my Wagner Furno 500 Heat Gun. It starts for a few seconds then quits an error light and beeping occur.
