"Very pleased with quick and efficient installation of 12 solar panels and a storage battery. Scaffolding erected Monday morning, panels and battery installed Tuesday system checked and in full working order Wednesday just 9 weeks after accepting proposal

"Highly recommend this company. Our solar inverter had stopped working and the old installers no longer exist. A friend recommended this company after using them last year. Clean switch were very responsive and got us back up and running very quickly with a replacement, the staff were very friendly, knowledgeable and professional. Thank you."

Your search for professional solar PV installation in Bristol ends here! In today's world, more and more households and businesses are embracing renewable energy solutions to secure their future. This is where Clean Switch Solar steps in.
