

## Colombia photovoltaic pv systems

The country's cumulative utility-scale solar reached 486 MW at the end of December 2023. This represents only 2.4% of the country's total power generation capacity, which is 19.91 GW.

Colombia is supporting large-scale PV through auctions. In the latest procurement exercise, held in April 2023, Colombia's National Mining and Energy Planning Unit (UPME) assigned 7.493 MW of renewable energy capacity. The total included 5.774 MW spread across 147 solar projects.

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website. Any other transfer to third parties will not take place unless this is justified on the basis of applicable data protection regulations or if pv magazine is legally obliged to do so.

You may revoke this consent at any time with effect for the future, in which case your personal data will be deleted immediately. Otherwise, your data will be deleted if pv magazine has processed your request or the purpose of data storage is fulfilled.
