

Commercial solar battery storage 350 kWh

Commercial solar battery storage 350 kWh

Harnessing the power of solar energy is essential for businesses looking to reduce costs and improve sustainability. Our commercial solar battery storage solutions are designed to help you conserve every kilowatt hour of energy generated, ultimately increasing savings, minimizing reliance on the grid, and reducing your carbon footprint. Tailored to meet the unique needs of your business, our scalable battery storage systems optimize your solar electricity consumption, ensuring you get the most out of your investment.

At The Green Way Solar, we understand that each business has distinct energy requirements. That's why we offer a range of battery storage options from leading manufacturers like GivEnergy, SolarEdge, and Solax. Whether you are a small to medium enterprise (SME) or a large-scale utility, we have the right battery storage system to fit your operational needs.

GivEnergy is a British-owned manufacturer that provides versatile inverter and battery solutions for various applications. Their systems are available in sizes of 30kW, 50kW, and 100kW, allowing for modular energy storage increases in increments of 64kWh, up to a maximum of 256kWh. For larger-scale utility needs, GivEnergy offers options of 100kW, 150kW, and 500kW, which can be combined for even greater energy storage capacity. This flexibility makes GivEnergy an ideal choice for businesses seeking to expand their energy storage as their needs grow.

We also install SolarEdge commercial batteries, renowned for their high-capacity storage and efficiency. With capacities ranging from 9.7 kWh to 23.2 kWh, these batteries help businesses maximize solar power utilization and reduce energy costs. SolarEdge batteries boast an impressive 94.5% round-trip efficiency, advanced safety features, and seamless integration with existing systems, ensuring reliable energy management and long-term savings for your business.

SolaX is another top-tier option we offer, known for superior performance and reliability. With capacities from 30 kWh to 125 kWh, SolaX batteries enable businesses to maximize their solar power usage and potentially cut energy costs by up to 50%. Featuring a remarkable 97% round-trip efficiency and a 10-year warranty, SolaX batteries provide intelligent energy management and seamless integration, helping our clients achieve their sustainability goals while enjoying a robust return on investment.

Investing in commercial solar battery storage not only enhances your energy efficiency but also contributes to a more sustainable future. Our expert team at The Green Way Solar is here to help you assess your energy needs, select the right battery storage solution, and implement it seamlessly. Contact us today to learn more about how our commercial solar battery storage systems can benefit your business and make the switch to cleaner, more efficient energy.

Commercial solar battery storage 350 kWh

The Green Way Solar Ltd is an Introducer Appointed Representative (Financial Services Register No. 971826) of Phoenix Financial Consultants Limited (Phoenix). Phoenix is a credit broker, not a lender. Phoenix is authorised and regulated by the Financial Conduct Authority (FRN: 539195), and offers finance from its panel of lenders. All finance subject to status and credit checks.

We have chosen two of the most sophisticated battery systems on the market – Tesla Powerwall 2, Givenergy and a SolaX option for homes that have a three-phase supply to manage surplus solar power. These systems come with excellent storage capacity and warranties, and work well with smart energy tariffs like Octopus Agile and Octopus Go. By pairing these batteries with a ‘time of use’ tariff, your business can significantly cut down on energy costs.
