Consortium for Energy Efficiency wikipedia

CEE is the US and Canadian consortium of natural gas and electric efficiency program administrators. We work together to accelerate the development and availability of energy efficient products and services for lasting public benefit.

The CEE Integrated Home is a connected, fuel neutral, grid and distribution system interactive, efficient home where devices and systems seamlessly communicate to optimize value for both consumers and the utility grid and distribution systems.

"Through CEE, members specify and then present a single binational voice to key market players with confidence that the organization has considered and vetted critical aspects of utility system operations, customer needs and in service of shared public purpose objectives."
