Daly bms website

To become a leading global provider of new energy solutions, DALY BMS specializes in the manufacturing, distribution, design, research, and servicing of cutting-edge Lithium Battery Management Systems (BMS). With a presence spanning over 130 countries, including key markets like India, Russia, Turkey, Pakistan, Egypt, Argentina, Spain, the US, Germany, South Korea, and Japan, we cater to diverse energy needs worldwide.

As an innovative and rapidly expanding enterprise, Daly is committed to a research and development ethos centered on "Pragmatism, Innovation, Efficiency." Our relentless pursuit of pioneering BMS solutions is underscored by a dedication to technological advancement. We have secured close to a hundred patents, encompassing breakthroughs such as glue injection waterproofing and advanced thermal conductivity control panels.

3. In 2017, DALY BMS expanded the market. Taking the lead in the layout of domestic and international e-commerce platforms, DALY products were exported to more than 130 overseas countries and regions.

4. In 2018, Daly BMS focused on technological innovation. The "Little Red Board" with a unique injection technology quickly hit the market; smart BMS was promoted in a timely manner; nearly 1,000 types of boards were developed; and personalized customization was realized.

5. In 2019, DALY BMS established its brand. DALY BMS was the first in the industry to open a lithium e-commerce business school which provided public welfare training for 10 million people online and offline, and won wide acclaim in the industry.

6. In 2020, DALY BMS took the advantage of the industry. Following the trend, DALY BMS continued to strengthen R& D development, manufactured the "high current," "fan type" protection board, obtained vehicle-level technology, and fully iterated its products.

7. In 2021, DALY BMS grew by leaps and bounds. The PACK parallel protection board was developed to realize the safe parallel connection of lithium battery packs, effectively replacing lead-acid batteries in all fields. The revenue this year in DALY reached a new level.

8. In 2022, DALY BMS kept on developing. The company relocated to Songshan Lake High-tech Zone, upgraded the R& D team and equipment, strengthened the system and cultural construction, optimized the brand and market management, and strove to become the leading enterprise in new energy industry.

Dongguan DALY Electronics Co., Ltd. is an innovative enterprise specializing in Battery Management System. It pursues the principle of "respect, brand, common goal, achievement sharing", with the mission of

innovating intelligent technology and creating and enjoying the green energy world, and with the vision of becoming the world's leading new energy company driven by technology.

With technology as the driving force, DALY BMS has established DALY-IPD integrating product R& D management system, and obtained nearly 100 patents, such as Plastic Injection for wetproof and High Thermal Conductivity Control Board.

DALY has promoted standard BMS, smart BMS, PACK parallel BMS, active balancer BMS etc. which can meet the application needs of various lithium batteries in power, energy storage and other fields. The personalized customization of BMS can be fulfilled in DALY BMS.

DALY BMS has more than 500 employees and more than 30 cutting-edge equipment such as high and low temperature testing machines, load meters, battery simulation testers, intelligent charging and discharging cabinets, vibration tables, and HIL test cabinets. And here we have 13 intelligent production lines and 100,000 Square meter modern factory area now, with an annual output of more than 10 million BMS.
