Data center energy storage quito

Quito DC is a specially designed facility to safely house and maintain IT and communications equipment. In addition, it is fully redundant, managed and administered by certified professionals. Flexibility in power, space and network connectivity allow for growing businesses to efficiently adapt to their changing realities. It also offers computer platforms that support everything from secure storage and backup systems to cloud services.

Quito has three providers running its four data centers. Transnexus Ecuador's facilities include Edificio Transeletric, EdgeUno's facilities include EdgeUno Datacenter Quito Ecuador, and Telconet's facilities include Telconet Cloudcenter Quito.

We have found building footprints for two facilities in Quito, adding up to 17,287 square feet, with the largest building covering 8,643 square feet, and containing the Edificio Transeletric facility.

QUITO, Ecuador, June 12, 2018 /PRNewswire/ --Global communications and IT provider CenturyLink, Inc. (NYSE: CTL) is expanding its broad regional offering of colocation, hosting, cloud computing, security, collaboration, communications and managed services for its existing and new customers by launching a new data center in Quito, Ecuador.

Ecuador's new data center integrates with CenturyLink's 17 other data centers in Latin America, as well as the company's broad global infrastructure, by providing direct connectivity to CenturyLink's approximately 450,000 route miles of fiber globally.

The new Quito data center will provide customers with a processing environment designed to provide high levels of availability, improved quality and increased speed of access to the rest of the world. The new facility also offers customers fiber route diversity for deployment of contingency environments.

"Located in proximity to customers, with 24x7 availability and next-generation security systems, this new data center was built to optimize energy and space efficiencies," commented Gabriel del Campo, vice president, data center and security, CenturyLink Latin America. "By taking this approach, we were able to have the facility operational in less time -- an important benefit to customers eager to take advantage of our data center services."

"Our data center and managed services business is growing," added del Campo. "We count on high quality data centers to provide our customers with the best solutions and services."

About CenturyLinkCenturyLink (NYSE: CTL) is the second largest U.S. communications provider to global enterprise customers. With customers in more than 60 countries and an intense focus on the customer experience, CenturyLink strives to be the world's best networking company by solving customers'
