

Deka batteries of the highest quality at the best price

Deka batteries of the highest quality at the best price

DEKA BATTERIES is the world's largest and most modern independent battery manufacturer. They manufacture millions of lead-acid batteries of different sizes and types for a very wide range of applications. Since 1946 it has had an unrivaled reputation in the industry for manufacturing quality products produced in state-of-the-art facilities.

A privately owned family business founded in 1946 offering a wide range of energy solutions for transportation, motive power, standby power, and wire and cable. The company produces more than 515 types of Deka brand batteries, as well as other well-known brands for automobiles, boats, motorcycles, forklifts, stationary backup systems, and many other applications.

Since 1946 their batteries have earned a well-deserved reputation for performance and robustness. They are preferred by the American O.E.M.s. More than 250 quality controls, an avant-garde manufacturing process and the use of the first materials result in a battery with higher quality, useful life and performance.

State-of-the-art manufacturing, using the industry's most modern computer-integrated equipment, has made East Penn the leader in advanced battery manufacturing technology. Computerization is implemented in all phases of battery production.

The company's modern facilities as well as long-standing "green" culture has made East Penn the most environmentally conscious and proactive battery manufacturer and recycler in the world.

A baterias you will have the opportunity to buy the best battery for your car, at the best price, with a fast delivery service and all with the guarantee of the market's leading website.

With the Deka Sports Power(R) AGM Battery, frequent replacement of your battery and high maintenance is over! The absorbed glass mat design is spill-proof and provides long life and excellent performance. It uses the battery that provides the most advanced power and value in the industry, so you can enjoy your free time, worry-free.

AGM design means that all electrolyte (acid) is absorbed by the separator material. This technology outperforms traditional batteries and eliminates acid spills and equipment damage.

If you have any questions about the choice of battery, you can contact us and we will advise you. At baterias we offer you an advisory service for choosing your battery totally free and without obligation.

Deep cycle monoblock battery, excellent alternative to stationary batteries since, like these, they offer a long
